- 7.04 LICENSED PLUMBER REQUIRED. All installations of water service pipes and connections to the water system shall be made by a licensed plumber.
- 7.05 PERMIT REQUIRED. Before any person makes a connection with the public water system, a written permit must be obtained from the City Clerk. The following shall apply to all permits:
1. APPLICATION. Application for the permit shall be filed with the clerk on blanks furnished by the city. It shall include a legal description of the property, the name of the property owner, the name and address of the person who will do the work, and the general uses of the water. No different or additional uses will be allowed except by written permission of the clerk.

- 7.06 FEE FOR INITIAL CONNECTION. The fee for the initial connection of water lines shall be one hundred (\$100.00) dollars.  
(Code of Iowa, Sec. 384.84(2))
- 7.07 ABANDONED CONNECTIONS. When an old water service is abandoned or a service is renewed with a new tap in the main, all abandoned connections with the mains shall be turned off at the corporation cock and made absolutely water tight.
- 7.08 TAPPING MAINS. All taps into water mains shall be made under the direct supervision of the Superintendent of Public Works and in accord with the following:
  1. INDEPENDENT SERVICES. No more than one house, building or premises shall be supplied from one tap unless special written permission is obtained from the council and unless provision is made so that each house, building or premise may be shut off independently of the other.
  2. SIZES AND LOCATION OF TAPS. All taps shall be made with an approved saddle connector. All taps in the mains shall be made in the top one-third (1/3) portion of the pipe. No main shall be tapped nearer than two (2) feet of the joint of the main.
  3. CORPORATION COCK. A brass corporation cock of the pattern and weight approved by the council shall be inserted in every tap in the main. The corporation cock in the main shall in no case be smaller than one (1) size smaller than the service pipe.
  4. LOCATION RECORD. An accurate and dimensional sketch showing the exact location of the tap shall be filed with the City Clerk in such form as required by him or her.

- 7.10 CURB STOP. There shall be installed a main shutoff valve of the inverted key type on the water service pipe at the outer sidewalk line with a suitable lock of a pattern approved by the council. The shutoff valve shall be covered with a heavy metal cover having the letter "W" marked thereon, visible and even with the pavement or ground.

- 7.11 INTERIOR STOP AND WASTE COCK. There shall be installed a shutoff valve and waste cock on every service pipe inside the building as close to the entrance of the pipe within the building as possible and so located that the water can be shut off conveniently and the pipes drained. Where one service pipe supplies more than one customer within the building, there shall be separate valves for each such customer so that service may be shut off for one without interfering with the service to the others.
- 7.12 SHUTTING OFF THE WATER SUPPLY. After giving reasonable notice, the superintendent may shut off the supply of water to any customer because of any substantial violation of this article. The supply shall not be turned on again until all violations have been corrected and the mayor has ordered the water to be turned on.
- 7.13 OWNER RESPONSIBLE FOR MAINTENANCE. It shall be the responsibility of the owner of the property connected to any water main to keep in good repair and free of any leaks, the corporation cock and water service pipe, whether in the public right of way or not. All expenses incident to the installation, connection and maintenance of the water shall be the responsibility of the owner. The owner shall indemnify the city from any loss or damage that may directly or indirectly be occasioned by the installation of the water.  
(Editor's Note: Ordinance 254, passed & approved December 9, 2020 amended Section 7.13 & adding 7.19)
- 7.14 FAILURE TO MAINTAIN. When any corporation cock, water service pipe, or curb stop becomes defective and leaks and the owner fails to repair the leak and any damage to street surface resulting from the leak, the city may do so and assess the costs to the property owner and if not paid within 30 days of billing, the clerk shall certify the cost to the county auditor to be collected in the same manner as taxes. (Code of Iowa, Sec. 364.12(3h))
- 7.15 WATER MAIN EXTENSION POLICY. A water main extension will be made by the city upon application by any person desiring service to his or her property who signs a contract for such service and pays the cost thereof through a connection charge or otherwise as required by this chapter. No water main will be extended beyond the city limits for commercial or residential purposes unless the applicant agrees to voluntarily petition for annexation simultaneously with such extension where the applicant's property is contiguous to the corporate limits, or agrees to so petition as soon as the applicant's property becomes contiguous to the city limits and files for future use such petition so conditioned.

Water mains will be extended beyond the city limits for any industrial establishment which will employ ten employees or more within one year of the extension over the above existing employment in the community, without annexation being required if it is shown that the industry needs the tax benefit, or if it is on property not contiguous to the city limits.

If the water superintendent determines that no foreseeable need will occur for a public water main, and so recommends to the city council upon council approval, an applicant for service may be permitted to construct a private main in an undeveloped public right-of-way (i.e. no traveled way or no more than a graded and/or traveled vehicular way), provided the work shall meet the city requirements for installations in the public way, including placement in the standard location, protection of work, quality of construction, and backfilling. Such main shall originate in a meter and be the property of the owner who shall be responsible for maintenance in the same manner as with water service pipes. It shall be a condition of the contract for connection that the city will not reimburse the owner for such a main if it has to be replaced with a public main after five years or more use.

7.16 MAIN EXTENSION CHARGES. Water service shall be provided through an extension of a water main in the following cases:

1. For distances up to 50 feet beyond existing end of a city-owned main, upon request of a person who contracts to immediately tap the main upon the completion of the extension and who can be expected to use water service upon the completion of construction of the residence or commercial building or facility to be served...no connection charge.
2. Where two applicants, one on each side of a street make application at the same time under the same contract conditions as in "1." above, extension will be made for 100 feet...no connection charge.
3. Where a single tap is contemplated by an applicant for an extension exceeding 50 feet and it is not foreseeable that other customer taps will be applied for before construction is begun, the applicant shall deposit with the city clerk a sum equal to the estimated cost of the extension required, as determined by the water superintendent, and enter into a contract providing for the deposit and any future rebates in accordance with the following provisions:
  - a. The city will refund any excess of deposit over the actual cost for the extension.
  - b. For each customer later connected to the main, the city will rebate the proportional share (by feet of frontage) as set out in the contract, the cost of the extension to the original applicant, but not in excess of the final payment by that applicant, provided such connections are made within five years, after which time no rebates shall be paid. However, the applicant shall be entitled to a refund of the unpaid balance of the full amount deposited with the city whenever the revenue derived from the sale of water to customers directly connected to the extension is equal in each of two consecutive twelve (12) month periods within the five years following application to ten (10) percent of the total actual cost of the main extension. Customer is defined as the occupant of a one-family dwelling, a one-family portion of a two-family dwelling, or as a single commercial establishment contracting for water in its own name (and from its own meter).

4. The main extension shall be built to city standards and become the property of the city as it is installed. If the applicant hires the construction, the city shall inspect the work for compliance with city standards and may enforce the specifications.

7.17 WATER MAIN CONSTRUCTION STANDARDS. No water tap will be allowed for service to a property except when a public water main runs along the street in front of the property (unless an alley or easement is determined by the city to be the best approach to serving the property) and at least ten (10) feet beyond the side property line, extended, nearest to the supply side of the main.

The tap must be at least four (4) feet beyond that property line, extended, of the abutting property. No public main shall be less than four inches in diameter, but no such four-inch (4") main shall be extended more than two hundred (200) feet and only if no foreseeable and feasible user can be served beyond said 200 feet. The city reserves the right to put in the size of main required for an adequate system of mains in the future to provide fire flow and adequate pressure for reasonably foreseeable customer service. The main shall be installed and of the quality required by specifications adopted by the council upon recommendation of the water superintendent.

7.18 INSPECTION AND APPROVAL. All water service pipes and their connections to the water system must be inspected and approved by the superintendent. If approval is refused, the plumber or property owner must immediately proceed to correct the work in order to meet approval. Every person who uses or intends to use the municipal water system shall permit the superintendent to enter the premises to inspect or make necessary alterations or repairs at all reasonable hours and on proof of authority.

7.20 WATER SHORTAGES. A water shortage exists whenever, for reasons of drought conditions, consumer demand or treatment plant or distribution systems operation or maintenance, water quantity and quality cannot be maintained at a level sufficient to meet the demands of the customers using the system. Whenever, in the opinion of the Utility Superintendent, conditions exist which create a water shortage, the Utility Superintendent or designee shall have the authority to declare a public Water Watch, Water Warning or Water Emergency, during which time the following measures and provisions shall be in effect to produce an orderly and equitable reduction of water consumption. Whenever the Utility Superintendent finds that the conditions which gave rise to the Water Emergency no longer exist, said officer is authorized to either declare the termination of the Water Emergency or reduce the type of emergency conditions as set forth in Section 7.20 hereof. 2. Findings of Fact
  - A. The flood hazard areas of the City of George are subject to periodic inundation which can result in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood protection and relief, and impairment of the tax base all of which adversely affect the public health, safety and general welfare of the community.
  - B. These flood losses, hazards, and related adverse effects are caused by: (i) The occupancy of flood hazard areas by uses vulnerable to flood damages which create hazardous conditions as a result of being inadequately elevated or otherwise protected from flooding and (ii) the cumulative effect of obstructions on the floodplain causing increases in flood heights and velocities.
  - C. This ordinance relies upon engineering methodology for analyzing flood hazards which is consistent with the standards established by the Department of Natural Resources.

### 3. Statement of Purpose

It is the purpose of this Ordinance to protect and preserve the rights, privileges and property of the City of George and its residents and to preserve and improve the peace, safety, health, welfare, and comfort and convenience of its residents by minimizing those flood losses described in Section 15.02(2)(A) of this Ordinance with provisions designed to:

- A. Reserve sufficient floodplain area for the conveyance of flood flows so that flood heights and velocities will not be increased substantially.
- B. Restrict or prohibit uses which are dangerous to health, safety or property in times of flood or which cause excessive increases in flood heights or velocities.
- C. Require that uses vulnerable to floods, including public facilities which serve such uses, be protected against flood damage at the time of initial construction or substantial improvement.

## TITLE VII

- D. Protect individuals from buying lands which may not be suited for intended purposes because of flood hazard.
- E. Assure that eligibility is maintained for property owners in the community to purchase flood insurance through the National Flood Insurance Program.

When an interpretation is needed as to the exact location of a boundary, the Zoning Administrator shall make the necessary interpretation. The Board of Adjustment shall hear and decide appeals when it is alleged that there is an error in any requirement, decision, or determination made by the Zoning Administrator in the enforcement or administration of this Ordinance.

#### 4. Compliance

The standards required by this Ordinance are considered reasonable for regulatory purposes. This Ordinance does not imply that areas outside the designated Floodplain (Overlay) District areas will be free from flooding or flood damages. This Ordinance shall not create liability on the part of the City of George or any officer or employee thereof for any flood damages that result from reliance on this Ordinance or any administrative decision lawfully made there under.

### 8. Severability

If any section, clause, provision or portion of this Ordinance is adjudged unconstitutional or invalid by a court of competent jurisdiction, the remainder of this Ordinance shall not be affected thereby.

  - 1) Description of the work to be covered by the permit for which application is to be made.

## TITLE VII

- 2) Description of the land on which the proposed work is to be done (e.g., lot, block, track, street address or similar description) that will readily identify and locate the work to be done.
  - 3) Location and dimensions of all structures and additions.

## **TITLE VII**

### **15.05 ESTABLISHMENT OF ZONING (OVERLAY) DISTRICTS.**

The floodplain areas within the jurisdiction of this ordinance are hereby divided into the following districts:

1. Floodplain (Overlay) District – those areas identified as Zone A on the Official Flood Plain Zoning Map

The boundaries shall be as shown on the Official Floodplain Zoning Map. Within these districts, all uses not allowed as Permitted Uses are prohibited unless a variance to the terms of this ordinance is granted after due consideration by the Board of Adjustment.

### **15.06 STANDARDS FOR FLOODPLAIN (OVERLAY) DISTRICT.**

#### 1. Permitted Uses

- A. All development within the Floodplain District shall be permitted to the extent that they are not prohibited by any other ordinance (or underlying zoning district) and provided they meet the applicable performance standards of the Floodplain District.
- B. Any development which involves placement of structures, factory-built homes, fill or other obstructions, storage of materials or equipment, excavation or alteration of a watercourse shall be reviewed by the Department of Natural Resources to determine (i) whether the land involved is either wholly or partly within the floodway or floodway fringe and (ii) the base flood elevation. The applicant shall be responsible for providing the Department of Natural Resources with sufficient technical information to make the determination.
- C. Review by the Iowa Department of Natural Resources is not required for the proposed construction of new or replacement bridges or culverts where:
  - 1) The bridge or culvert is located on a stream that drains less than two (2) square miles, and
  - 2) The bridge or culvert is not associated with a channel modification that constitutes a channel change as specified in 567-71.2(2), Iowa Administrative Code.

#### 2. Performance Standards

All development must be consistent with the need to minimize flood damage and meet the following applicable performance standards. Where base flood elevations and floodway data have not been provided in the Flood Insurance Study, the Iowa Department of Natural Resources shall be contacted to compute such data. The applicant will be responsible for providing the Department of Natural Resources with sufficient technical information to make such determination.

## TITLE VII

### A. All development shall:

- 1) Be designed and adequately anchored to prevent flotation, collapse or lateral movement.
- 2) Use construction methods and practices that will minimize flood damage.
- 3) Use construction materials and utility equipment that are resistant to flood damage.

### B. Residential structures - All new or substantially improved residential structures shall have the lowest floor, including basement, elevated a minimum of one (1) foot above the base flood elevation. Construction shall be upon compacted fill which shall, at all points, be no lower than 1.0 ft. above the base flood elevation and extend at such elevation at least 18 feet beyond the limits of any structure erected thereon. Alternate methods of elevating (such as piers or extended foundations) may be allowed subject to favorable consideration by the Board of Adjustment, where existing topography, street grades, or other factors preclude elevating by fill. In such cases, the methods used must be adequate to support the structure as well as withstand the various forces and hazards associated with flooding.

All new residential structures located in areas that would become isolated due to flooding of surrounding ground shall be provided with a means of access that will be passable by wheeled vehicles during the base flood. However, this criterion shall not apply where the Administrator determines there is sufficient flood warning time for the protection of life and property. When estimating flood warning time, consideration shall be given to the criteria listed in 567-75.2(3), Iowa Administrative Code.

### C. Non-residential structures - All new or substantially improved non-residential structures shall have the lowest floor (including basement) elevated a minimum of one (1) foot above the base flood elevation, or together with attendant utility and sanitary systems, be floodproofed to such a level. When floodproofing is utilized, a professional engineer registered in the State of Iowa shall certify that the floodproofing methods used are adequate to withstand the flood depths, pressures, velocities, impact and uplift forces and other factors associated with the base flood; and that the structure, below the base flood elevation is watertight with walls substantially impermeable to the passage of water. A record of the certification indicating the specific elevation (in relation to North American Vertical Datum 1988) to which any structures are floodproofed shall be maintained by the Administrator.

### D. All new and substantially improved structures:

- 1) Fully enclosed areas below the "lowest floor" (not including basements) that are subject to flooding shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwaters. Designs for meeting this requirement must either be certified by a registered professional engineer or meet or exceed the following minimum criteria:

## TITLE VII

- a. A minimum of two (2) openings, with positioning on at least two (2) walls, having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding shall be provided.)
- b. The bottom of all openings shall be no higher than one foot above grade.
- c. Openings may be equipped with screens, louvers, valves, or other coverings or devices provided they permit the automatic entry and exit of floodwaters.

Such areas shall be used solely for parking of vehicles, building access and low damage potential storage.

- 2) New and substantially improved structures must be designed (or modified) and adequately anchored to prevent flotation, collapse, or lateral movement of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy.
- 3) New and substantially improved structures shall be constructed with electric meter, electrical service panel box, hot water heater, heating, air conditioning, ventilation equipment (including ductwork), and other similar machinery and equipment elevated (or in the case on non-residential structures, optionally floodproofed to) a minimum of one (1) foot above the base flood elevation.
- 4) New and substantially improved structures shall be constructed with plumbing, gas lines, water/gas meters and other similar service utilities either elevated (or in the case of non-residential structures, optionally floodproofed to) a minimum of one (1) foot above the base flood elevation or designed to be watertight and withstand inundation to such a level.

### E. Factory-built homes:

- 1) All new and substantially improved factory-built homes, including those placed in existing factory-built home parks or subdivisions, shall be elevated on a permanent foundation such that the lowest floor of the structure is a minimum of one (1) foot above the base flood elevation.
- 2) All new and substantially improved factory-built homes, including those placed in existing factory-built home parks or subdivisions, shall be anchored to resist flotation, collapse, or lateral movement. Anchorage systems may include, but are not limited to, use of over-the-top or frame ties to ground anchors as required by the State Building Code.

### F. Utility and Sanitary Systems:

- 1) On-site waste disposal and water supply systems shall be located or designed to avoid impairment to the system or contamination from the system during flooding.

## TITLE VII

- 2) All new and replacement sanitary sewage systems shall be designed to minimize or eliminate infiltration of flood waters into the system as well as the discharge of effluent into flood waters. Wastewater treatment facilities (other than on-site systems) shall be provided with a level of flood protection equal to or greater than one (1) foot above the base flood elevation.
  - 3) New or replacement water supply systems shall be designed to minimize or eliminate infiltration of flood waters into the system. Water supply treatment facilities (other than on-site systems) shall be provided with a level of protection equal to or greater than one (1) foot above the base flood elevation.
  - 4) Utilities such as gas or electrical systems shall be located and constructed to minimize or eliminate flood damage to the system and the risk associated with such flood damaged or impaired systems.
- G. Storage of materials and equipment that are flammable, explosive or injurious to human, animal or plant life is prohibited unless elevated a minimum of one (1) foot above the base flood elevation. Other material and equipment must either be similarly elevated or (i) not be subject to major flood damage and be anchored to prevent movement due to flood waters or (ii) be readily removable from the area within the time available after flood warning.
- H. Flood control structural works such as levees, flood walls, etc. shall provide, at a minimum, protection from the base flood with a minimum of 3 ft. of design freeboard and shall provide for adequate interior drainage. In addition, the Department of Natural Resources shall approve structural flood control works.
- I. Watercourse alterations or relocations must be designed to maintain the flood carrying capacity within the altered or relocated portion. In addition, the Department of Natural Resources must approve such alterations or relocations.
- J. Subdivisions (including factory-built home parks and subdivisions) shall be consistent with the need to minimize flood damages and shall have adequate drainage provided to reduce exposure to flood damage. Development associated with subdivision proposals (including the installation of public utilities) shall meet the applicable performance standards of this Ordinance. Subdivision proposals intended for residential use shall provide all lots with a means of access which will be passable by wheeled vehicles during the base flood. Proposals for subdivisions greater than five (5) acres or fifty (50) lots (whichever is less) shall include base flood elevation data for those areas located within the Floodplain (Overlay) District.
- K. Accessory Structures to Residential Uses
- 1) Detached garages, sheds, and similar structures that are incidental to a residential use are exempt from the base flood elevation requirements where the following criteria are satisfied.

## TITLE VII

- a. The structure shall be designed to have low flood damage potential. Its size shall not exceed 600 sq. ft. in size. Those portions of the structure located less than 1 foot above the base flood elevation must be constructed of flood-resistant materials.
  - b. The structure shall be used solely for low flood damage potential purposes such as vehicle parking and limited storage. The structure shall not be used for human habitation.
  - c. The structure shall be constructed and placed on the building site so as to offer minimum resistance to the flow of floodwaters.
  - d. The structure shall be firmly anchored to prevent flotation, collapse, and lateral movement which may result in damage to other structures.
  - e. The structure's service facilities such as electrical and heating equipment shall be elevated or floodproofed to at least one foot above the base flood elevation.
  - f. The structure's walls shall include openings that satisfy the provisions of Section 15.06(2)(D)(1) of this Ordinance.
- 2) Exemption from the base flood elevation requirements for such a structure may result in increased premium rates for flood insurance coverage of the structure and its contents.

### L. Recreational Vehicles

- 1) Recreational vehicles are exempt from the requirements of Section 15.06(2)(E) of this Ordinance regarding anchoring and elevation of factory-built homes when the following criteria are satisfied.
  - a. The recreational vehicle shall be located on the site for less than 180 consecutive days, and,
  - b. The recreational vehicle must be fully licensed and ready for highway use. A recreational vehicle is ready for highway use if it is on its wheels or jacking system and is attached to the site only by quick disconnect type utilities and security devices and has no permanently attached additions.
- 2) Recreational vehicles that are located on the site for more than 180 consecutive days or are not ready for highway use must satisfy requirements of Section 15.06(2)(E) of this Ordinance regarding anchoring and elevation of factory-built homes.

M. Pipeline river and stream crossings shall be buried in the streambed and banks, or otherwise sufficiently protected to prevent rupture due to channel degradation and meandering.

## TITLE VII

N. Maximum Damage Potential Development – All new or substantially improved maximum damage potential development shall have the lowest floor (including basement) elevated a minimum of one (1) foot above the elevation of the 500-year flood, or together with attendant utility and sanitary systems, be floodproofed to such a level. When floodproofing is utilized, a professional engineer registered in the State of Iowa shall certify that the floodproofing methods used are adequate to withstand the flood depths, pressures, velocities, impact and uplift forces and other factors associated with the 0.2% annual chance flood; and that the structure, below the 0.2% annual chance flood elevation is watertight with walls substantially impermeable to the passage of water. A record of the certification indicating the specific elevation (in relation to North American Vertical Datum 1988) to which any structures are floodproofed shall be maintained by the Administrator. Where 0.2% chance flood elevation data has not been provided in the Flood Insurance Study, the Iowa Department of Natural Resources shall be contacted to compute such data. The applicant will be responsible for providing the Department of Natural Resources with sufficient technical information to make such determinations.

### 15.07 APPOINTMENT AND DUTIES OF BOARD OF ADJUSTMENT.

1. Appointment and Duties of Board of Adjustment - A Board of Adjustment is hereby established which shall hear and decide (i) appeals and (ii) requests for variances to the provisions of this ordinance, and shall take any other action which is required of the Board.
2. Appeals - Where it is alleged there is any error in any order, requirement, decision, or determination made by an administrative official in the enforcement of this ordinance, the aggrieved party may appeal such action. The notice of appeal shall be filed with the Board of Adjustment and with the official from whom the appeal is taken and shall set forth the specific reason for the appeal. The official from whom the appeal is taken shall transmit to the Board of Adjustment all the documents constituting the record upon which the action appealed from was taken.
3. Variance - The Board of Adjustment may authorize upon request in specific cases such variances from the terms of this Ordinance that will not be contrary to the public interest where, owing to special conditions, a literal enforcement of the provisions of this Ordinance will result in unnecessary hardship. Variances granted must meet the following applicable standards.
  - A. Variances shall only be granted upon: (i) a showing of good and sufficient cause, (ii) a determination that failure to grant the variance would result in exceptional hardship to the applicant, and (iii) a determination that the granting of the variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, create nuisances, cause fraud on or victimization of the public or conflict with existing local codes or ordinances.
  - B. Variances shall only be granted upon a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief.

## TITLE VII

- C. In cases where the variance involves a lower level of flood protection for structures than what is ordinarily required by this Ordinance, the applicant shall be notified in writing over the signature of the Administrator that: (i) the issuance of a variance will result in increased premium rates for flood insurance up to amounts as high as \$25 for \$100 of insurance coverage and (ii) such construction increases risks to life and property.
- D. All variances granted shall have the concurrence or approval of the Department of Natural Resources.

### 4. Hearings and Decisions of the Board of Adjustment

- A. Hearings. Upon the filing with the Board of Adjustment of an Appeal or a request for a Variance, the Board shall hold a public hearing. The Board shall fix a reasonable time for the hearing and give public notice thereof, as well as due notice to parties in interest. At the hearing, any party may appear in person or by agent or attorney and present written or oral evidence. The Board may require the appellant or applicant to provide such information as is reasonably deemed necessary and may request the technical assistance and/or evaluation of a professional engineer or other expert person or agency, including the Department of Natural Resources.
- B. Decisions. The Board shall arrive at a decision on an Appeal or Variance within a reasonable time. In passing upon an Appeal, the Board may, so long as such action is in conformity with the provisions of this ordinance, reverse or affirm, wholly or in part, or modify the order, requirement, decision, or determination appealed from, and it shall make its decision, in writing, setting forth the findings of fact and the reasons for its decision. In granting a Variance, the Board shall consider such factors as contained in this section and all other relevant sections of this ordinance and may prescribe such conditions as contained in Section 15.07(4)(B)(2).
  - 1) Factors Upon Which the Decision of the Board of Adjustment Shall be Based - In passing upon applications for Variances, the Board shall consider all relevant factors specified in other sections of this Ordinance and:
    - a. The danger to life and property due to increased flood heights or velocities caused by encroachments.
    - b. The danger that materials may be swept on to other land or downstream to the injury of others.
    - c. The proposed water supply and sanitation systems and the ability of these systems to prevent disease, contamination and unsanitary conditions.
    - d. The susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the individual owner.
    - e. The importance of the services provided by the proposed facility to the City.

## TITLE VII

- f. The requirements of the facility for a floodplain location.
  - g. The availability of alternative locations not subject to flooding for the proposed use.
  - h. The compatibility of the proposed use with existing development and development anticipated in the foreseeable future.
  - i. The relationship of the proposed use to the comprehensive plan and floodplain management program for the area.
  - j. The safety of access to the property in times of flood for ordinary and emergency vehicles.
  - k. The expected heights, velocity, duration, rate of rise and sediment transport of the flood water expected at the site.
  - l. The cost of providing governmental services during and after flood conditions, including maintenance and repair of public utilities (sewer, gas, electrical and water systems), facilities, streets and bridges.
  - m. Such other factors which are relevant to the purpose of this Ordinance.
- 2) Conditions Attached to Variances - Upon consideration of the factors listed above, the Board of Adjustment may attach such conditions to the granting of variances as it deems necessary to further the purpose of this Ordinance. Such conditions may include, but not necessarily be limited to:
- a. Modification of waste disposal and water supply facilities.
  - b. Limitation of periods of use and operation.
  - c. Imposition of operational controls, sureties, and deed restrictions.
  - d. Requirements for construction of channel modifications, dikes, levees, and other protective measures, provided such are approved by the Department of Natural Resources and are deemed the only practical alternative to achieving the purpose of this Ordinance.
  - e. Floodproofing measures shall be designed consistent with the flood protection elevation for the particular area, flood velocities, duration, rate of rise, hydrostatic and hydrodynamic forces, and other factors associated with the regulatory flood. The Board of Adjustment shall require that the applicant submit a plan or document certified by a registered professional engineer that the floodproofing measures are consistent with the regulatory flood protection elevation and associated flood factors for the particular area.

## TITLE VII

5. Appeals to the Court - Any person or persons, jointly or severally, aggrieved by any decision of the Board of Adjustment may present to a court of record a petition, duly verified, setting forth that such decision is illegal, in whole or in part, specifying the grounds of the illegality. Such petition shall be presented to the court within thirty days after the filing of the decision in the office of the Board.

### 15.08 NONCONFORMING USES.

1. A structure or the use of a structure or premises which was lawful before the passage or amendment of this Ordinance, but which is not in conformity with the provisions of this Ordinance, may be continued subject to the following conditions:
  - A. If such use is discontinued for six (6) consecutive months, any future use of the building premises shall conform to this Ordinance.
  - B. Uses or adjuncts thereof that are or become nuisances shall not be entitled to continue as nonconforming uses.
  - C. If any nonconforming use or structure is destroyed by any means, including flood, it shall not be reconstructed if the cost is more than fifty (50) percent of the market value of the structure before the damage occurred, unless it is reconstructed in conformity with the provisions of this Ordinance. This limitation does not include the cost of any alteration to comply with existing state or local health, sanitary, building or safety codes or regulations or the cost of any alteration of a structure listed on the National Register of Historic Places, provided that the alteration shall not preclude its continued designation.
2. Except as provided in Section 15.08(1)(B), any use which has been permitted as a Variance shall be considered a conforming use.

### 15.09 PENALTIES FOR VIOLATION.

Violations of the provisions of this Ordinance or failure to comply with any of the requirements (including violations of conditions and safeguards established in connection with grants of Variances) shall constitute a misdemeanor. Any person who violates this Ordinance or fails to comply with any of its requirements shall upon conviction thereof be fined not more than \$500.00 (five hundred dollars). Each day such violation continues shall be considered a separate offense. Nothing herein contained prevent the City of George from taking such other lawful action as is necessary to prevent or remedy violation.

An Ordinance granting to ITC MIDWEST LLC, a wholly owned subsidiary of ITC HOLDINGS CORP., its successors and assigns (the "Company"), the right and franchise to acquire, construct, reconstruct, erect, maintain, operate and remove in the City of George, Lyon County, Iowa, a transmission system for electric power and the right to erect and maintain the necessary poles, lines, wires, conduits and other appliances, equipment and substations for the transmission of electric current and telecommunications along, under and upon the streets, avenues, alleys and public places in the City of George, Lyon County, Iowa; granting the right to erect and maintain upon the streets, avenues, alleys and public places, transmission lines through the City of George, Lyon County, Iowa, for the period of twenty-five (25) years; and granting the right of eminent domain.

BE IT ORDAINED BY THE City Council of the City of George, Lyon, County, Iowa, hereinafter referred to as the "City":

#### **Section 1. Grant.**

There is hereby granted to the Company the right and franchise to acquire, construct, reconstruct, erect, maintain, operate and remove in the City a transmission system for electric power and the right to erect and maintain the necessary poles, lines, wires, conduits, and other appliances, equipment and substations for the transmission of electric current and telecommunications (collectively, the "Facilities") along, under and upon the streets, avenues, alleys and public places in the City; also the right to erect and maintain upon the streets, avenues, alleys and public places, transmission lines through the City for the period of twenty-five (25) years; also the right of eminent domain as provided in Section 364.2 of the Code of Iowa.

#### **Section 3. Relocation.**

Except as provided herein below, the Company shall, at its cost and expense, locate and relocate its Facilities in, on or over any public street or alley in the City in such a manner as the City may at any time reasonably require for the purposes of facilitating the construction, reconstruction, maintenance or repair of the street or alley or any public improvement of, in or about any such street or alley or reasonably promoting the efficient operation of any such improvement. If the City orders or requests the Company to relocate its Facilities for the primary benefit of a commercial or private project, or as the result of the initial request of a commercial

## TITLE VII

or private developer or other non-public entity, the Company shall receive payment for the cost of such relocation as a precondition to relocating its Facilities. The City shall consider reasonable alternatives in designing its public works projects so as not arbitrarily to cause the Company unreasonable additional expense in exercising its authority under this section. The City shall also provide a reasonable alternate location for the Company's Facilities. The City shall give the Company reasonable advance written notice to vacate a public right-of-way. Vacating a public right-of-way shall not deprive the Company of its right to operate and maintain existing Facilities until the reasonable cost of relocating the same are paid to the Company.

### **Section 4. Modern System.**

The system authorized by this Ordinance shall be kept in an operable condition consistent with good utility practice and the reliability standards of the North American Electric Reliability Council (NERC).

### **Section 5. System Plans.**

The Company recognizes the importance of community input when siting new projects to serve the community and electricity distribution as well as the authority of the City to permit and otherwise regulate siting activity. The Company will apply to the City for a permit for work performed in City rights-of-way in accordance with City regulations and provide project-specific mapping, which may be protected under Iowa's open meetings and open records laws, Iowa Code Chapters 21 and 22, to be used solely and exclusively by the City in administering the use and occupancy of the public right-of-way and not otherwise to be relied upon for any purpose.

At the request of the City, mapping information will be reviewed with the City staff. All such reviews will be in compliance with the Federal Energy Regulatory Commission regulations or the regulations of other agencies with authority over the review and dissemination of critical infrastructure information and infrastructure security, and subject to all protective provisions for critical infrastructure under Iowa's open meetings and open records laws, Iowa Code Chapters 21 and 22. Prior to any excavating in the rights-of-way, both parties shall follow the procedures set forth in Iowa Code Chapter 480 or an entity with a similar function utilized by both the City and the Company, currently the Iowa One Call System.

For emergencies, the Company may proceed with the work without first applying for a permit, provided, however, that the Company shall apply for and obtain a permit as soon as commercially practicable after commencing such work.

### **Section 6. Vegetation Management.**

To promote public safety in proximity to its Facilities and to maintain electric reliability, the Company is authorized and empowered to remove, cut, trim, destroy, or otherwise control any tree, shrub, brush, bush or any parts thereof located within or extending into any street, alley, right-of-way or public grounds. The foregoing vegetation management shall be completed in accordance with the most current nationally accepted safety and utility industry standards, as revised and updated from time to time.

## **TITLE VII**

### **Section 7. Continuous Service.**

Service to be rendered by the Company under this franchise shall be continuous unless prevented from doing so by fire, Acts of God, unavoidable accidents or casualties, customer outages or interruptions on the bulk electric system to no fault of Company or interruptions necessary to properly service the Company's equipment, and in such event service shall be resumed as quickly as is commercially practicable.

### **Section 8. Non-exclusivity.**

The franchise granted by this Ordinance shall not be exclusive.

### **Section 9. Undergrounding.**

The City may request estimates for the undergrounding of replacement lines, upgrades or new lines, including lines to be adjusted for road moves or for other specific projects. When requested, the Company will provide to the City two estimates: 1) An estimate for the cost of the project with overhead construction, and 2) An estimate for the cost of the project with underground construction. The City will have no more than 60 days from the estimate date to determine if it wants the line built overhead or placed underground. If the City chooses underground construction for such project, the City will be responsible for the incremental cost of undergrounding, if and to the extent, such costs are not already part of or included in a precondition payment for relocation pursuant to Section 3. The incremental cost of undergrounding is defined as the differential between the estimate for underground construction and the estimate for overhead construction. Upon receipt of the City's payment for the incremental cost of undergrounding, the Company will install the underground facilities. The Company reserves the right to bill City for the amount that the incremental cost associated with installation exceeds its estimate. The City reserves the right to a refund of overpayment if the incremental costs are less than the amount billed in the estimate. If the City wishes to have a line not scheduled for replacement or upgrade placed underground, the City shall contact the Company to make such a request. The City shall cover all costs related to this work. If undergrounding of transmission lines requires entities interconnecting with the Company to make adjustments to their electrical systems, the City bears the responsibility of communication with those entities and, if it chooses, the cost of converting their facilities from overhead to underground. The Company reserves the right to review all the City's communications with the affected entities.

### **Section 10. Severability.**

If any section, provision, or part of this Ordinance shall be adjudged to be invalid or unconstitutional, such adjudication shall not affect the validity of the Ordinance as a whole or any section, provision, or part thereof not adjudged invalid or unconstitutional.

### **Section 11. Term of Agreement.**

The term of the franchise granted by this Ordinance and the rights granted thereunder shall continue for the period of twenty-five (25) years from and after written acceptance by the Company.

## **TITLE VII**

### **Section 12. Publication Expenses.**

The expense of the publication of this Ordinance shall be paid by the Company.

### **Section 13. Repeal of Conflicting Ordinances.**

All ordinances, or parts of ordinances, insofar as they are in direct conflict herewith, are hereby repealed.

### **Section 14. Acceptance.**

The franchise granted by this Ordinance shall be conditioned upon acceptance by the Company in writing. The acceptance shall be filed with the City Clerk within ninety (90) days from the passage of this Ordinance.

### **Section 15. Future Developments.**

The City agrees it will not permit or grant approval for any development, construction or land uses in the City that would result in or cause the Company's Facilities to violate setback requirements, safety requirements or any other provision of the National Electric Safety Code or any law, regulation or ordinance of the State of Iowa, Lyon County or the City.

### **Section 15. Closing.**

This Ordinance sets forth and constitutes the entire agreement between the Company and the City with respect to the rights contained herein, and may not be superseded, modified or otherwise amended without the approval and acceptance of the Company. Upon acceptance by the Company, this Ordinance shall supersede, abrogate and repeal any prior electric system ordinance between the Company and the City as of the date this Ordinance is accepted by the Company. Notwithstanding the foregoing, in no event shall the City enact any ordinance or place any limitations, either operationally or through the assessment of fees, that create additional burdens upon the Company, or that delay utility operations.
